Ilham Maulana Habibie, B.I.E

Software Engineer

ilham.maulana.07.0698@gmail.com | +6283194310725 | Medan, Indonesia | https://linkedin.com/in/imaha7 | https://github.com/imaha7 | https://imaha7.vercel.app

PROFESSIONAL SUMMARY

Versatile Software Engineer with extensive experience developing full-stack web architectures, mobile applications, and enterprise data visualization dashboards. Proven track record collaborating with enterprise clients such as PT. Astra Honda Motor to deploy high-availability BI solutions and scalable front-end systems. Skilled in React, Next.js, Vue.js, Laravel, and Motionboard BI, delivering high-performance software and streamlined business operations.

WORK EXPERIENCE

IT Developer — PT. Sazanka Henig Solusi *(10/2023 – Present)* | Jakarta Selatan, Indonesia

- Architected and deployed over 9 mission-critical operational data visualization dashboards using Motionboard for client PT. Astra Honda Motor, optimizing real-time manufacturing monitoring.
- Authored custom SQL, InfluxQL, and OracleQL queries to ingest high-volume telemetry data, accelerating dashboard query responsiveness by 35%.
- Collaborated cross-functionally with sales and project delivery teams to conduct enterprise technical demos, deliver solution proposals, and support end-to-end client onboarding.
- Troubleshot and resolved complex data pipeline defects to maintain 99.9% uptime across production intelligence environments.

Key Technologies: *Motionboard, Board, OracleQL, InfluxQL, SQL, Business Intelligence, REST APIs*

Frontend Engineer & Mobile Engineer — Ogloba Ltd. *(11/2022 – 07/2023)* | Jakarta Selatan, Indonesia

- Engineered scalable web portals and mobile applications for enterprise e-Gift Card solutions, enhancing UI responsiveness across thousands of active retail users.
- Refactored legacy front-end architectures into reusable component libraries with React.js, Next.js, and Material UI, speeding feature delivery by 25%.
- Integrated RESTful API endpoints with state management workflows using Axios to guarantee real-time transaction reliability.
- Collaborated closely with back-end engineers and design teams to ensure high code quality, consistent layout design, and seamless cross-platform performance.

Key Technologies: *React.js, Next.js, React Native, TypeScript, JavaScript, Material UI*

Frontend Engineer — PT. Zegen Solusi Mandiri *(04/2022 – 11/2022)* | Jakarta Barat, Indonesia

- Translated high-fidelity UI/UX design wireframes into modern, accessible, and responsive web applications utilizing HTML5, CSS3, and modern JavaScript frameworks.
- Implemented robust client-side caching and state optimization strategies, reducing web application page load latency by 30%.
- Integrated front-end views with backend microservices and databases through secure REST API integrations.
- Instituted front-end debugging procedures and code reviews, ensuring clean code adhering to best development practices.

Key Technologies: *HTML5, CSS3, JavaScript, React.js, REST API, Axios*

Fullstack Engineer — PT. Tiga Ruang Imaji *(07/2021 – 11/2021)* | Medan, Indonesia

- Designed comprehensive client-side and server-side web application architectures utilizing Vue.js and Laravel PHP frameworks.
- Developed relational database models and secured REST API endpoints for multiple client management platforms.
- Implemented end-to-end performance tuning and server-side optimizations to ensure high availability during peak concurrent loads.

Key Technologies: *Vue.js, Laravel, PHP, MySQL, REST APIs, Git*

Android Engineer — PT. BES Digital Indonesia *(09/2018 – 12/2019)* | Medan, Indonesia

- Designed and published native Android applications utilizing Kotlin, adhering to clean architecture and modern mobile design principles.
- Integrated external RESTful endpoints and mobile caching mechanisms to provide smooth offline data persistence.
- Conducted automated unit testing and performance profiling, improving app crash-free session rates above 99%.

Key Technologies: *Kotlin, Android SDK, REST APIs, Git, Mobile Development*

TECHNICAL & PROFESSIONAL SKILLS

Frontend & Mobile Development: JavaScript, TypeScript, React.js, Next.js, Vue.js, React Native, Kotlin, HTML5/CSS3, Material UI, Axios

Backend & Database Engineering: PHP, Laravel, REST APIs, SQL, InfluxQL, OracleQL, Relational Databases, API Integration

Data Analytics & Tools: Motionboard, Board, Data Visualization, Git, NPM, Network Security, Power BI, CRM Systems, Google Cloud

KEY PROJECTS & INITIATIVES

Astra Honda Motor Production Monitoring Dashboard *(Lead BI Developer)* | 10/2023 - Present

- Engineered end-to-end industrial data visualization suite monitoring mission-critical factory production operations in real time.
- Implemented specialized InfluxQL and OracleQL querying layers to display plant metrics across 9+ production monitoring views.
- Enhanced dashboard throughput and system stability, ensuring low-latency data rendering for manufacturing operations managers.

Stack: *Motionboard, OracleQL, InfluxQL, SQL, Data Visualization, CI/CD Pipeline*

Emrys & Carrefour eGift Card Management Suite *(Frontend & Mobile Engineer)* | 11/2022 - 07/2023

- Built dynamic multi-tenant web portals and mobile client apps for managing corporate e-Gift Card redemption and transactions.
- Refactored user-facing responsive layouts in React.js and Next.js, resolving critical customer-reported workflow bottlenecks.
- Secured API communications with backend microservices to enable automated balance inquiries and voucher issuances.

Stack: *React.js, Next.js, React Native, Axios, Material UI, CI/CD Pipeline*

CRM Management Dashboard Platform *(Creator)* | 04/2022 - 11/2022

- Designed an intuitive web-based sales management dashboard to streamline order tracking, inventory monitoring, and sales analytics for enhanced operational efficiency.
- Created an end-to-end web interface for a crypto investment platform, featuring real-time market data visualization, portfolio tracking, and seamless trade execution.
- Developed a user-friendly educational web application focused on interactive learning workflows, course management, and accessible student progress tracking.

Stack: *TypeScript, React, Next.js, MaterialUI, REST API, CI/CD Pipeline*

Education Management Dashboard Platform *(Fullstack Engineer)* | 2021

- Developed an interactive web-based UI for an educational platform to enhance online learning workflows and student engagement.
- Engineered responsive high-performance system serving 10k+ users.
- Implemented Laravel back-end microservices and designed responsive Vue.js views alongside mobile clients.

Stack: *Javascript, Vue.js, Laravel, PHP, REST API's, AWS Cloud, CI/CD Pipeline*

Wakprint - Printing Service Marketplace Platform *(Fullstack & Mobile Developer)* | 11/2019 - 02/2021

- Developed full-stack marketplace ecosystem for custom printing services spanning web interfaces and native Android applications.

- Implemented Laravel back-end microservices and designed responsive Vue.js views alongside Kotlin mobile clients.
- Delivered unified order management, merchant administration dashboards, and customer tracking functionalities.

Stack: *Vue.js, Laravel, Kotlin, PHP, MySQL, REST APIs, CI/CD Pipeline*

EDUCATION

Bachelor of Computer Science in Computer Science — Mikroskil University *(02/2021)*
GPA: 3.71 / 4.00 | Graduated with Magna Cum Laude honors for outstanding academic excellence. | Core Coursework: Software Engineering, Database Systems, Data Structures & Algorithms, Mobile Application Development, Network Security.

CERTIFICATIONS & CREDENTIALS

- **Motionboard Expert Certified** — WingArc1st *(2023 – None)*
- **Motionboard Professional Certified** — WingArc1st *(2023 – None)*
- **JavaScript (Intermediate) Certificate** — HackerRank *(2022 – None)*
- **Foresec Certified in Network Security** — ForeSec *(2021 – None)*
- **Level 200: Building a Planning Solution in Board** — Board *(2025)*
- **Level 100: Foundations of Building in Board** — Board *(2025)*
