Ilham Maulana Habibie, B.Sc.

Senior Software Engineer & BI Specialist

ilham.maulana.07.0698@gmail.com | +6283194310725 | Medan, Indonesia

LinkedIn | GitHub | Portfolio

Versatile Software Engineer with extensive experience developing full-stack web architectures, mobile applications, and enterprise data visualization dashboards. Proven track record collaborating with enterprise clients (e.g., PT. Astra Honda Motor) to deploy high-availability BI solutions and scalable front-end systems. Skilled in React, Next.js, Vue.js, Laravel, Board BI, Power BI and Motionboard BI, consistently delivering high-performance software and streamlining business operations.

TECHNICAL & PROFESSIONAL SKILLS

Frontend & Mobile:	JavaScript, TypeScript, React.js, Next.js, Vue.js, React Native, Kotlin, HTML5/CSS3, Material UI, Axios
Backend & Database:	PHP, Laravel, Go, Phyton, PostgreeSQL, MySQL, REST APIs, SQL, InfluxQL, OracleQL, Relational Databases, API Integration
Data Analytics & Tools:	Motionboard, Board, Power BI, Data Visualization, Git, CI/CD, Network Security, Google Cloud, AWS

PROFESSIONAL EXPERIENCE & KEY PROJECTS

IT Developer (Lead BI Developer)

10/2023 - Present

PT. Sazanka Henig Solusi — *Jakarta Selatan, Indonesia*

- Architected and deployed over 20 mission-critical operational data visualization dashboards using Motionboard for PT. Astra Honda Motor, optimizing real-time manufacturing monitoring.
- Authored custom SQL, InfluxQL, and OracleQL queries to ingest high-volume telemetry data, accelerating dashboard query responsiveness by 35%.
- Collaborated cross-functionally with sales and project delivery teams to conduct enterprise technical demos, deliver solution proposals, and support end-to-end client onboarding.
- Troubleshot and resolved complex data pipeline defects, ensuring low-latency rendering and maintaining 99.9% uptime across production intelligence environments.

Stack: Motionboard, OracleQL, InfluxQL, SQL, Business Intelligence, Board, Power BI, Javascript, Typescript, CI/CD

Frontend & Mobile Engineer

11/2022 - 07/2023

Ogloba Ltd. — *Jakarta Selatan, Indonesia*

- Engineered scalable web portals and mobile client apps for the Emrys & Carrefour e-Gift Card management suite, enhancing UI responsiveness for thousands of active retail users.
- Refactored legacy front-end architectures into reusable component libraries with React.js, Next.js, and Material UI, resolving customer-reported bottlenecks and speeding feature delivery by 25%.
- Secured REST API communications with backend microservices via Axios to enable automated balance inquiries, voucher issuances, and guarantee real-time transaction reliability.

Stack: React.js, Next.js, React Native, TypeScript, REST APIs, Material UI

Frontend Engineer

04/2022 - 11/2022

PT. Zegen Solusi Mandiri — *Jakarta Barat, Indonesia*

- Designed and created an intuitive CRM management dashboard to streamline order tracking, inventory monitoring, and sales analytics for enhanced operational efficiency.
- Developed an end-to-end web interface for a crypto investment platform, featuring real-time market data visualization and portfolio tracking.
- Implemented robust client-side caching and state optimization strategies, reducing web application page load latency by 30%.

Stack: TypeScript, React.js, Next.js, HTML5/CSS3, REST API

Fullstack Engineer

07/2021 - 11/2021

PT. Tiga Ruang Imaji — *Medan, Indonesia*

- Developed an interactive Education Management Platform focusing on course workflows, user engagement, and accessible student progress tracking for 10k+ concurrent users.
- Designed comprehensive client-side and server-side web architectures utilizing Vue.js and Laravel PHP frameworks.
- Implemented end-to-end performance tuning, relational database models, and secured REST API microservices to ensure high availability.

Stack: Vue.js, Laravel, PHP, MySQL, AWS Cloud, Git

Android Developer & Fullstack Engineer

09/2018 - 02/2021

PT. BES Digital Indonesia (inc. Wakprint Platform) — *Medan, Indonesia*

- Developed Wakprint, a full-stack marketplace ecosystem for custom printing services, delivering unified order management and merchant administration dashboards.
- Designed and published native Android applications utilizing Kotlin, adhering to clean architecture, external API integration, and mobile caching for offline data persistence.
- Conducted automated unit testing and performance profiling, improving app crash-free session rates above 99%.

Stack: Kotlin, Android SDK, Vue.js, Laravel, MySQL, REST APIs

EDUCATION

Bachelor of Computer Science

Graduated: 02/2021

Mikroskil University — *GPA: 3.71 / 4.00 (Magna Cum Laude)*

CERTIFICATIONS

- PL-300 certification prep: Microsoft Power BI Data Analyst — *Udemy (2026)*
- Angular (Intermediate & Basic) — *HackerRank (2026)*
- SQL (Advanced) — *HackerRank (2026)*
- Node.js (Intermediate & Basic) — *HackerRank (2026)*
- Software Engineer & Frontend Developer (React) — *HackerRank (2026)*
- Motionboard Expert Certified — *WingArc1st (2024)*
- Motionboard Professional Certified — *WingArc1st (2023)*
- Level 200: Building a Planning Solution — *Board (2025)*
- Level 100: Foundations of Building — *Board (2025)*
- JavaScript (Intermediate & Basic) Certificate — *HackerRank (2022)*
- Problem Solving (Intermediate & Basic) — *HackerRank (2022)*
- Rest API (Intermediate) — *HackerRank (2022)*
- CSS — *HackerRank (2022)*
- Teknologi Baru Android di Google I/O 2021 — *Dicoding Indonesia (2021)*
- Foresec Certified in Network Security — *ForeSec (2019)*
- Sertifikasi Kompetensi Bahasa Inggris — *LSK-BIG (2014)*
